

AURA CRYPTO & FX AI - User Manual

System Overview

AURA is an institutional-grade market analysis terminal that provides real-time cryptocurrency and forex market analysis using advanced technical indicators, Smart Money Concepts (SMC), and institutional liquidity analysis.

Version: 2.8.5

Developed by: @ STARICO

System Design: ANTIGRAVITY

Quick Start

1. Launch the Application

Open `index.html` in your web browser or visit:

- Production:** <https://aura-market-analysis.vercel.app>

2. Select Your Trading Pair

Choose from the left panel:

- Cryptocurrencies:** BTC/USD, ETH/USD, SOL/USD
- Forex & Commodities:** XAU/USD (Gold), EUR/USD, GBP/USD, USD/JPY

3. Configure Your Analysis

- Trading Mode:** Scalping, Intraday, or Swing
- Timeframe:** 5M, 15M, 1H, 4H, or 1D

4. Run Analysis

Click "**ACTIVATE SCAN**" to generate a comprehensive market analysis including:

- Entry/Exit levels
- Stop Loss placement
- Take Profit targets
- Confidence metrics
- Risk-to-Reward ratio

Core Features

Real-Time Ticker Tape

The header displays live price movements for all tracked assets with:

- Current price
- Percentage change
- Visual indicators (green/red pulses)

Multi-Timeframe Matrix

View confluence across 5 timeframes simultaneously:

- Bullish** (green up arrow)
- Bearish** (red down arrow)

Smart Money Concepts (SMC)

Track institutional trading patterns:

- Order Blocks (OB):** Institutional accumulation/distribution zones
- Fair Value Gaps (FVG):** Imbalance zones for price discovery
- Liquidity Sweeps:** Stop-hunt activity detection
- RSI/MACD/Vol:** Technical indicator status

Market Structure Analysis

The system identifies:

- Swing highs/lows
- Liquidity pools
- Structural breaks
- Confluence zones

Risk Management Calculator

Configure your position sizing:

- Enter account balance
- Set risk percentage (recommended: 1-2%)
- View calculated position size and suggested leverage

Premium Features

- Contact support for billing issues
- Verify account premium status in admin

Keyboard Shortcuts

Action	Shortcut
Maximize Chart	Click expand icon
Switch Timeframe	Click timeframe buttons
Run Analysis	Click "ACTIVATE SCAN"
Toggle Admin	Click system status in footer

Support & Contact

For technical support or feature requests:

- Check the admin console for system status
 - Review browser console for error messages
 - Contact @ STARICO for premium support
-

Disclaimer

RISK WARNING: This system provides market analysis and trading signals. Trading cryptocurrencies and forex involves significant risk. Always:

- Use proper risk management
- Never risk more than you can afford to lose
- Verify signals with your own analysis
- Consider your risk tolerance

This is not financial advice. Trade at your own risk.
